Surveying Techniques
Report

In the present advanced era, surveying has acquired unique general importance. Surveys are used to review the construction of roads, railways, dams, water supply, agricultural land, forest areas, dams, canals and construction of new towns and development of old towns. Surveying is done with the help of various equipment. It includes prismatic compass and plane table. As business opportunities are available through this course, the college and the department of geography are undertaking this initiative. In the academic year 2024-25, B.A. Part 3, 16 students completed this course. For this, the head of the department Prof. Dr. Rathod S.B., Dr. Lagad S.J. and Prof.Dr. Sutar A.P. He was guided.
